

TRAINING

The training provided by *Marionnette et Thérapie* is a complement of training for people who are already - or about to become - professionals in health, education or rehabilitation and who wish to set up a puppet activity for therapeutic, educational or socialization purposes or who wish to join an existing team. The association does not issue a diploma but a certificate of internship with the detailed description of the training followed.

The **BASIC COURSES**, which are co-supervised by a puppeteer and a psychoanalyst or psychologist, are intended to provide trainees with:

- an introduction to the technical and artistic knowledge necessary for setting up a puppet workshop,
- an approach to psychological and psychoanalytical concepts that support the processes used when the puppet is used as a mediation.
- a reflection on the various possible devices according to the aim of the puppet activity, the handicap, the psychic disorders and the age of the participants.

Three basic courses of 40 hours over five days are planned for 2018. Full price: € 890 (supplement of € 50 for tales and puppets). Reduced rate for people who self-finance their training: contact us.
